

ETIKALA MADHURI

Frontend Developer • Angular • TypeScript

India | madhurimanu2022@gmail.com | 8186816063 | <https://github.com/madhuri-frontend> | www.linkedin.com/in/madhuri-etikala | <https://madhuri-portfolio-seven.vercel.app/>

PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 3.5+ years of experience building scalable web applications for enterprise and client-facing products. Specialized in Angular with a strong command of TypeScript, REST API integration, and component-based architecture. Delivered 10+ responsive websites and dashboards across healthcare, logistics, real estate, and education domains. Proven track record in Agile teams at TCS and in freelance environments with direct client ownership.

TECHNICAL SKILLS

Frameworks: Angular, TypeScript, JavaScript (ES6+)

UI / Styling: HTML5, CSS3, SCSS, Bootstrap 5, Angular Material

State Mgmt: Redux, Context API, RxJS (Observables, Subjects)

API & Data: RESTful API Integration, JSON, HTTP Client, Async/Await

Tools & DevOps: Git, GitHub, VS Code, NPM, Chrome DevTools

Methodology: Agile / Scrum, Sprint Planning, Code Reviews, SDLC

Concepts: Responsive Design, Cross-Browser Compatibility, Component Architecture, Routing, Form Validation

WORK EXPERIENCE

Innostes Solutions | *Frontend Developer* Sep 2021 – Jan 2022

- Developed responsive websites and user interfaces while working in a startup environment with end-to-end frontend responsibilities.
- Converted UI designs into responsive web pages.
- Developed interactive user interfaces.
- Worked with HTML, CSS and JavaScript.
- Improved website responsiveness across devices.

Tata Consultancy Services (TCS) | *System Engineer – Frontend Developer* Feb 2022 – Jun 2025

Project: Business Reporting Dashboard | Angular, TypeScript, HTML5, CSS3, REST APIs, Oracle DB | 2.5 years

- Engineered 15+ reusable Angular components (data tables, filters, forms) that reduced new-feature development time by 30% through modular reuse across the dashboard.
- Integrated 10+ RESTful APIs to render live Oracle DB data in dynamic dashboards, eliminating manual report generation and cutting report turnaround from hours to seconds.
- Implemented Angular reactive forms with multi-level validation logic, reducing user input errors by ~40% across key reporting modules.
- Architected client-side routing using Angular Router with lazy loading, improving initial page load performance and maintainability for a 20+ module application.
- Collaborated in a 10-member Agile team, consistently delivering sprint commitments and participating in peer code reviews that improved code quality and onboarding efficiency.

Project: Database Maintenance & Support System | Oracle Database | 1 year

- Monitored and resolved 100+ database alerts monthly (CPU load, tablespace, connectivity), maintaining 99.9% system uptime across production environments.
- Administered user access controls, object/system privileges, and role assignments for enterprise database users, ensuring security compliance.
- Supported OS patching and incident management cycles, coordinating database start/stop operations with zero unplanned downtime.

MedNexus NS | Healthcare SaaS | Angular, TypeScript, HTML5, CSS3, REST APIs

- Built responsive UI components and page layouts for a healthcare platform, improving mobile usability and reducing layout-reported bugs by 50%.
- Integrated REST APIs for dynamic data rendering across patient-facing modules, cutting manual data entry steps for clinical staff.
- Collaborated directly with senior developers in Agile sprints, contributing to feature delivery and resolving UI defects within SLA.

MedJobs | Healthcare Job Portal | Angular, TypeScript, HTML5, SCSS, REST APIs

- Developed dashboard screens and user workflow pages for a job portal, enabling end-to-end candidate search and application tracking.
- Implemented responsive layouts and form validations that improved form completion rates and reduced submission errors.
- Applied Git branching strategy and Agile practices, maintaining clean PR history and on-schedule feature delivery.

CLIENT WEBSITE PROJECTS (HTML5 · CSS3 · JAVASCRIPT · ANGULAR)

Delivered 8 production-ready business websites across diverse industries, consistently achieving mobile-first responsive design and cross-browser compatibility.
